EXECUTIVE OVERVIEWS

NODUST it is urgent and part of a constant evolution and optimization of its processes to continue to respond to the trust placed in us by our customers. It currently has a multidisciplinary team of Civil Engineers, Mechanics, IT and specialized Assistants with extensive experience in solving problems adding value to your product.

BRAND

Obtain, with the help of our professionals and the trust of our customers, complete services and innovative solutions for the market aimed at protecting health in the mining and construction industry. Achieve excellence in processes with cutting-edge techniques and technologies that guarantee customer satisfaction as a company committed to social benefit and the environment.

VISION

"To be a leader in creating innovative technologies worldwide that adapt to the needs of each company, creating value for our partners, associates, employees, customers and societies where we operate"

MISSION

"We develop technological solutions to take care of health, optimizing processes and generating value for our users and their collaborators, delivering efficient and innovative alternatives. For this purpose, we have been developing strict work protocols for years that guarantee excellent results thanks to an internal structure of solid values that allow us to generate trust, loyalty and honesty between our employees and their families, consolidating us into quality products for our customers."

VALUES

Our company is governed by maintaining a solid form of work based on honesty and based on 3 key concepts:

COHERENCE, MEMORY AND CONSEQUENCES:

We understand that:

- Consistency must be sought and protected
- The memory must be cared for and protected.
- Finally, the consequences must be assumed, repaired and compensated for.
